Does anyone have any information about putting HF verticals inside PVC?
I have purchased a Hustler 6-BTV which will fit inside a 3" PVC
pipe. How do you get the darn thing to stand upright and
still "loook" like a flagple. please e-mail or post any suggestions.

To: ham-ant@ucsd.edu

My apartment in Manhattan is on the tenth floor and has one window. Does
anyone have a recommendation for an indoor 2m/70cm antenna? I hope to work
satellites with an indoor antenna.

Subject: Mobil On-Glass Ant. help.
To: ham-ant@ucsd.edu

Does anyone have the design specs for a 2M on-glass ant? The length of the wire is not a problem but the size/shape of the glass interfacing connector is what I need. Thanks for any help.
